DETAILED ACTION

Applicant's amendment filed 12/01/2006 has been entered. All pending claims have been carefully reconsidered in view of the amendment.

Allowable Subject Matter

Claims 1-5, 7, 9, 15-19 are allowed.

The following is an examiner's statement of reasons for allowance:

Optical coupling apparatus for coupling optical fibers to optoelectronic modules are well known in the art. As discussed in the previous office action, JP 60-250312 reference is the closest prior art with respect to claimed invention of the present application. While the '312 reference teaches a coupling apparatus having, *inter alia*, a fiber receiving portion with a slit, optical fiber fixing cap, optoelectronic receiving portion with a contact hole, wherein the fixing cap couples to the fiber receiving portion, similar to what is claimed in the instant application.

However, none of the prior art, including the '312 reference, discloses such optical coupling apparatus further comprising a projection portion extending lengthwise from the distal end of the optoelectronic device receiving portion, such that the projection is inserted into an insertion groove formed on a substrate of optoelectronic device module, as claimed in the instant application.

While mere projection element extending from an optoelectronic device housing that is designed to be inserted in an electronic circuit board, is known in the art (for example, see Tanaka- US 2005/0002620 A1), there is no credible or reasonable motivation why one of

ordinary skilled in the art would modify a device, such as that shown in the '312 reference, to have a projection portion in the manner claimed in the instant application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
